CLEAR WEEKS OUTSIDE HOLIDAYS

Headlines

- **Autumn and spring are crowded.** October 2026 holds 20 digital engineering events (27% of the window) and March and April 2027 hold another 22. The week of 5 October 2026 alone has 9, and the week of 15 March 2027 has 6.
- **Simulation is front-loaded.** 14 events tagged simulation fall in October 2026, then almost none until March. June 2027 is the next simulation peak, with 6.
- **Real quiet spots exist.** No digital engineering event is listed in the weeks of 9 November 2026, 22 February, 29 March and 3 May 2027, apart from the holiday gap from mid-December to late January.
- **Germany and the US dominate.** The US has 54 events and Germany 28. Munich is the busiest city with 7, ahead of Tokyo, Santa Clara, San Jose, Las Vegas, Amsterdam and London.

Topics by month

Events tagged with each topic, across all directories. An event can carry several tags.

	Oct 26	Nov 26	Dec 26	Jan 27	Feb 27	Mar 27	Apr 27	May 27	Jun 27	Jul 27	Aug 27	Sep 27

How to read this

The calendar is built from events whose dates are stated on an official source, so it shows what is confirmed, not what is rumoured. Later months look emptier because many organisers announce 6 to 12 months ahead: the thin August and September 2027 figures reflect announcements still to come, not a quiet market. Treat the clear weeks before spring 2027 as firm, and later gaps as provisional.

What the full report adds

- Your topic and region only, with the named events around any date you are considering
- Competing and neighbouring events week by week, with the organiser behind each
- Recommended windows and the ones to avoid, refreshed as new dates are confirmed

conference.as is an independent directory. Request the full report at info@conference.as. Figures drawn from the conference.as database on 4 October 2026.
